SITUATION ABSTRACT (REMEMBER TO PROVIDE THE HOOK TO INVOLVE CHARACTERS!)

The "Iris" is refitting in port, preparing for her maiden voyage, when difficulty strikes. Manipulation by influential Board members beaches the intended crew and replaces it with non-union scabs. The desperate crew turn to Engineer Santiago for help, while an influential shareholder expects Sir Guy to see the new crew installed with a minimum of fuss. Meanwhile controversy swirls around the design of the ship's Babbage Engine. The shareholders of B.E.S.V. ltd. want it off the ship, the Belgians want to steal the plans, and for Engineer Coppersmith the success of the design is all that stands between her Aunt and the poor house.
